Manufacturer's declaration regarding the Directive 2011/65/ EU (ROHS 2)

Dear Sir or Madam,

As a sustainably operating company, we have reviewed the "Directive 2011/65/EU of the European Parliament and of the Council of 8 June 2011 on the restriction of the use of certain hazardous substances in electrical and electronic equipment" (so-called RoHS 2) with regard to its applicability on our products.

Compared to the previous EU Directive (2002/95/EC), the list of substances and the limits defined in the Directive remain unchanged. We herewith confirm that all products leaving our company comply with the defined restricted substances or their limits.

In case of any future amendments to legal requirements or modifications made to lists of substances, equipment categories, or scope of the EU Directive 2011/65/EU, which may entail any information or documentation obligation, we will provide the required documents in a timely manner.

Yours sincerely

ALBRECHT JUNG GMBH & CO. KG
